DAYSAVER DATASHEET - ENGLISH

Wildix

DaySaver is an LTE gateway. It has two antennas, one for data connections, another one–for calls and SMS. It can be used as a backup for Cloud PBX, as a backup for the cable Internet connection, or, even as the only Internet access for small offices or during the events. In case the Internet goes down, DaySaver switches to LTE and uses the cellular data.

HIGHLIGHTS

- 1 GSM SIM slot
- PoE Support
- Two antennas
- 3G/ 4G/ LTE
- Support of inbound/ outbound SMS
- WAN/ LAN port

TECH SPECIFICATIONS

Physical interfaces

- 1 LAN and 1 WAN port, RJ-45 10/100Mbps

Power supply

- 12VDC 1,5 A (optional, WMP code: PS-12V2A)
- PoE 802.3af class 0

Max Power Consumption

- 8W

Environmental

- 80°C~40°C,
- Humidity: 5~90%, non-condensing

Physical dimensions

- 143 x 25 x 88 mm, 362 g

Physical

- LEDs: WAN, LAN, PWR (power), RUN (running), SIM
- 1 SIM slot
- 2 antennas (one for data, one for calls and SMS)
- Reset and Reboot buttons
